DETAILED ACTION

1. Claims 1-11 are pending in this application.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 (in part) and 7-9, drawn to the process of making Formula 1a (i.e. fused oxazinone = benzo[1,3]oxazinone and J = a substituted pyrrole derivative, see claim 8).

Group II, claim(s) 1-6 (in part), drawn to the process of making other fused oxazinone compounds.

Group III, claim(s) 10-11, drawn to a process of making of Formula III (intermediate).

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is a benzo[1,3]oxazinone ring and is different from the special technical feature of Groups II-III. The special technical feature of Group II is other fused oxazinones e.g. K = pyrido, pyrrole, etc. and is different from the special technical feature of Group I or Group III. The special technical feature of Group III is a diamide substituted phenyl ring and is different from the special technical feature of Groups I-II.

If applicants elect Group II, an election of a single disclosed species is required.

Art Unit: 1624

A telephone call was made to Mr. David Heiser on 1/3/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
